# ShurePlus Channels for Android

---

## Version Info

**App version:** 1.0.1.148 - Beta

**Last update:** July 6, 2021

## About This App

Discover and connect to networked, compatible Shure wireless systems. Roam the performance space while monitoring key Shure wireless system parameters—including RF signal strength, audio levels, battery life—and control the equipment remotely, including ShowLink®-enabled transmitters.

## What's New

- Support for Axient Digital ADX5D
- Support for SLX-D
- Support for additional phone models (see below)
- Support for Axient Analog
- Support for Light Theme and a setting to Match System theme
- Access Control
- Demo Mode

## Supported Shure Devices

- Axient Digital
- Axient Analog
- ULX-D
- QLX-D
- SLX-D
- UHF-R
- PSM1000

## Features

- Automatically discover and connect to networked Shure systems via:
- Wi-Fi (802.11n or 802.11ac), or
- Wired Ethernet (Ethernet adapter required)
- Quickly navigate your inventory with a sortable channel list
- Change RF band and frequency assignments
- Monitor critical parameters like RF level, audio level, and battery level
- Get in-app alerts about changes in device statuses

## Recommended Phone Support

The phones listed have been tested by Shure and are recommended to use for best experience. We encourage you to try your phone, even if it isn't on the list, because this will help us determine what other phones you want to be supported.

### Samsung:

- S9, S9+, S10, S10+, S20 Ultra
- S21 (new in version 1.0.1.148)
- Note 8, 9, 10
- Note 20 (new in version 1.0.1.148)

### Google:

- Pixel 3, 3XL, 4, 4XL
- Pixel 5 (new in version 1.0.1.148)

### LG:

- G7 ThinQ
- G8 ThinQ
- Velvet 5G

### OnePlus:

- OnePlus 6T, 7, 8, 9

### Huawei:

- P20 Pro
- P40 Pro (new in version 1.0.1.148)

### Motorola:

- Z3
- G7
- Z4

### Xiaomi:

- Redmi Note 10 (new in version 1.0.1.148)
- Mi 10 (new in version 1.0.1.148)

## Recommended Android Operating System Version Support

- Android 9
- Android 10
- Android 11

## Recommended Ethernet Adapter Support

In this version of ShurePlus Channels for Android, you can connect to your network of Shure devices either via Wi-Fi or wired Ethernet connection. Below are the Shure-tested and recommended Ethernet adapters. Each of them requires an additional adapter (e.g. USB-C to USB-A, or Micro-USB to USB-A) to connect to your smartphone model.

- **UGREEN** Ethernet Adapter USB 2.0 to 10/100 Network RJ45 LAN Wired Adapter
- **INSIGNIA** USB 3.0 to Gigabit Ethernet Adapter
- **Nonda** USB-A to USB-C Adapter

## Known Issues:

- Some group color channel assignments are not persistent after updating the application from the previous beta version
- Intermittent application crash when Axient Digital receivers network configuration is changed to “Switched” while on the Device Info page
- Intermittent application crash when the network is disconnected and reconnected
- Unable to discover UHF-R devices when Custom Group/Channel is set
- Axient Digital FD-C Frequency 2 does not update in the app display dynamically. Change views to see the frequency update
- After assigning a group color in the list view, the ability to navigate into the channel detail view requires a double tap instead of a single tap on the same channel cell
